

## Harel Mallac Technologies is recruiting System Engineers (Infrastructure)

As a Systems Engineer at HMT, you will be an integral part of our project-based approach, working directly with clients to design, implement, and manage their IT infrastructure. You will collaborate with a diverse team of professionals and work on exciting client projects, using the latest technologies. An advantage of this role is the opportunity for regional mobility, as our engineers may be called upon to provide implementation services outside of Mauritius. If you have 3-5 years of relevant experience and the drive to stay ahead in the ever-evolving IT landscape, we encourage you to apply.

### Job responsibilities:

- Design, implement, and maintain infrastructure hardware, servers, storage, and hyperconverged systems for client projects.
- Manage and administer relevant hypervisors, including VMware, Hyper-V, and Oracle KVM, ensuring project success.
- Utilize expertise in Virtual Desktop Infrastructure (VDI), including Citrix or other VDI solutions, to meet client requirements.
- Implement and manage cloud solutions on platforms such as Azure and AWS, aligning with client needs.
- Develop and maintain secure IT environments for our clients, following industry best practices.
- Collaborate with cross-functional project teams to troubleshoot and resolve technical issues, with a focus on common virtualization platforms.
- Stay up-to-date with emerging technologies and trends in the IT industry to provide clients with innovative solutions.
- Assist in the development and implementation of disaster recovery and business continuity plans for client projects.
- Evaluate and recommend security solutions and practices to protect sensitive client data.

### Skill & Competencies required:

- Bachelor's or Master's degree in Computer Science, Information Technology, Engineering or a related field (preferred).
- 3-5 years of proven experience as a Systems Engineer with a strong project focus.
- Solid knowledge of infrastructure hardware, servers, storage, and hyperconverged systems.
- Practical experience with hypervisors, including VMware, Hyper-V, and Oracle KVM, for client projects.
- Proficiency in VDI, including Citrix or other VDI solutions, for tailored client solutions.
- Hands-on experience with Azure and/or AWS to meet client cloud requirements.
- Familiarity with security concepts and relevant certifications (e.g., CISSP, CISM) for client data protection.
- Excellent problem-solving skills and the ability to work well in cross-functional project teams.
- Strong communication and interpersonal skills for effective client interactions.
- Regional mobility – willingness and ability to provide implementation services outside of Mauritius for regional projects.

**Employment Type:** Full-time

**Contact:** [hmt.talents@harelmallac.com](mailto:hmt.talents@harelmallac.com)

Only successful candidates will be called upon for interview.
